

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application:

LISTING OF CLAIMS:

1. (currently amended): A grease composition for auxiliary machinery of automobile electrical component, comprising
a base oil; and
a diurea compound, as a thickener, represented by the following general formula in an amount of from 5 to 35 % by mass based on the total amount of the grease composition:

(wherein R9 represents an aromatic hydrocarbon group having from 6 to 15 carbon atoms; and R8 and R10, which may be the same or different, each represents an aliphatic hydrocarbon group, an alicyclic hydrocarbon group, or a fused ring);

wherein the base oil contains an aromatic ester oil in an amount of 30 % by mass or more based on the total amount of the base oil, and wherein the base oil has a pour point not higher than -30 °C;

which further comprises two or more members selected from rust preventives made of a carboxylic acid or a carboxylate, ester based rust preventives, and amine based rust preventives in an amount of from 0.2 to 10 % by mass in total and from 0.1 to 9.9 % by mass singly based on the total amount of the grease composition.

2. (previously presented): The grease composition for auxiliary machinery of automobile electrical component according to claim 1, wherein the aromatic ester oil is a trimellitic ester oil or a pyromellitic ester oil.

3. (previously presented): The grease composition for auxiliary machinery of automobile electrical component according to claim 2, wherein the trimellitic ester oil and the pyromellitic ester oil, a hydrocarbon group to be derived is a hydrocarbon group having from 6 to 10 carbon atoms.

4. (previously presented): The grease composition for auxiliary machinery of automobile electrical component according to claim 1, which further comprises at least one member of carbon black and carbon nano tube as a conductive powder.

5. (canceled).

6. (previously presented): A rolling bearing comprising
an inner race;
an outer race;
plural rolling elements which are freely rollingly positioned between the inner race and the outer race; and
a grease composition according to claim 1, which is packed in the rolling bearing.

7. (previously presented): The rolling bearing according to claim 6, which further comprises a contact type rubber seal.
